

CYBER THREAT ALLIANCE

A MISSION WORTH CHAMPIONING

Our **CTA Champions** are individuals who believe in the mission of the Cyber Threat Alliance (CTA) and wish to lend their time and voice to help advocate for a collective approach to stronger cybersecurity.

These thought-leaders come from a wide range of backgrounds across industry, academia, and the non-profit sector. They can make this role their own, contributing to the work of CTA in a variety of ways.

LEADERSHIP AT CTA-SPONSORED EVENTS

CTA participates in and occasionally sponsors cybersecurity events in the U.S. and beyond. These allow us to offer opportunities for participation in roundtables, keynotes, and panel discussions, on topics including threat intelligence sharing, disruption activities, and more.

RESEARCH SUPPORT & COLLABORATION

We welcome opportunities to work together with our CTA Champions on joint research efforts. For example, in mid-2019, CTA provided sponsorship and feedback for a paper entitled "Next Steps In Playbook Driven Cyber Security," by CTA Champion Patrick Donegan, Principal Analyst at HardenStance.

INDUSTRY ENGAGEMENT & ADVOCACY

When it comes to improving cybersecurity, there is strength in numbers. Through engagement with fellow thought-leaders and professionals in industry, CTA Champions help us to build new relationships, strengthen existing ties, establish partnerships, and expand the diversity and reach of our membership.

Are you interested in becoming a CTA Champion? Contact admin@cyberthreatalliance.org today to learn more.
